SCULPTURAL
PUBLIC FURNISHINGS

NOVA C SERIES

Discover the flexibility to create seating configurations as unique as your space with this sculptural seating line.

The award-winning Nova C Series, designed by Johan Berhin, offers freedom of design through modularity. It's an ideal seamless seating solution for large public spaces such as universities, shopping centers, airports, libraries, office lobbies, hotels, and community centers.

The organic look of wood instantly draws people in to have a seat, but it's the remarkable comfort of these seats that encourages them to stay for a while!

And with our revolutionary, super-durable wood finish, the benches are sure to keep their beautiful appearance even in the heaviest traffic environments!

Put a new spin on your public seating with the Nova C Series!

LEAF LAMP SERIES

Designed by Peter Schumacher, the Leaf Lamp is an ambient and acoustic light made entirely of natural materials.

The foliage consists of thin wool felt leaves that offer both flameproof and sound-absorbing qualities.

The wool leaves are attached to birch branches, which are clustered organically to mimic the natural designs found in nature.

The Leaf Lamp Series comes in two standard formats. The wool clusters can be suspended from the ceiling as a pendant. They can also be fastened to the top of a real birch trunk or steel tube to take on the shape of a tree.

The Leaf Lamp Series won the 2016 Best of NeoCon Award for Innovation in the Decorative Lighting category.
