Making Places

A look book of our favorite projects

We don't make furniture!

We make places.

Places that elevate the value of a building. Places that create a delightful surprise for the end user. Places that inspire collaboration and creativity. Places you'll remember and will want to return to.

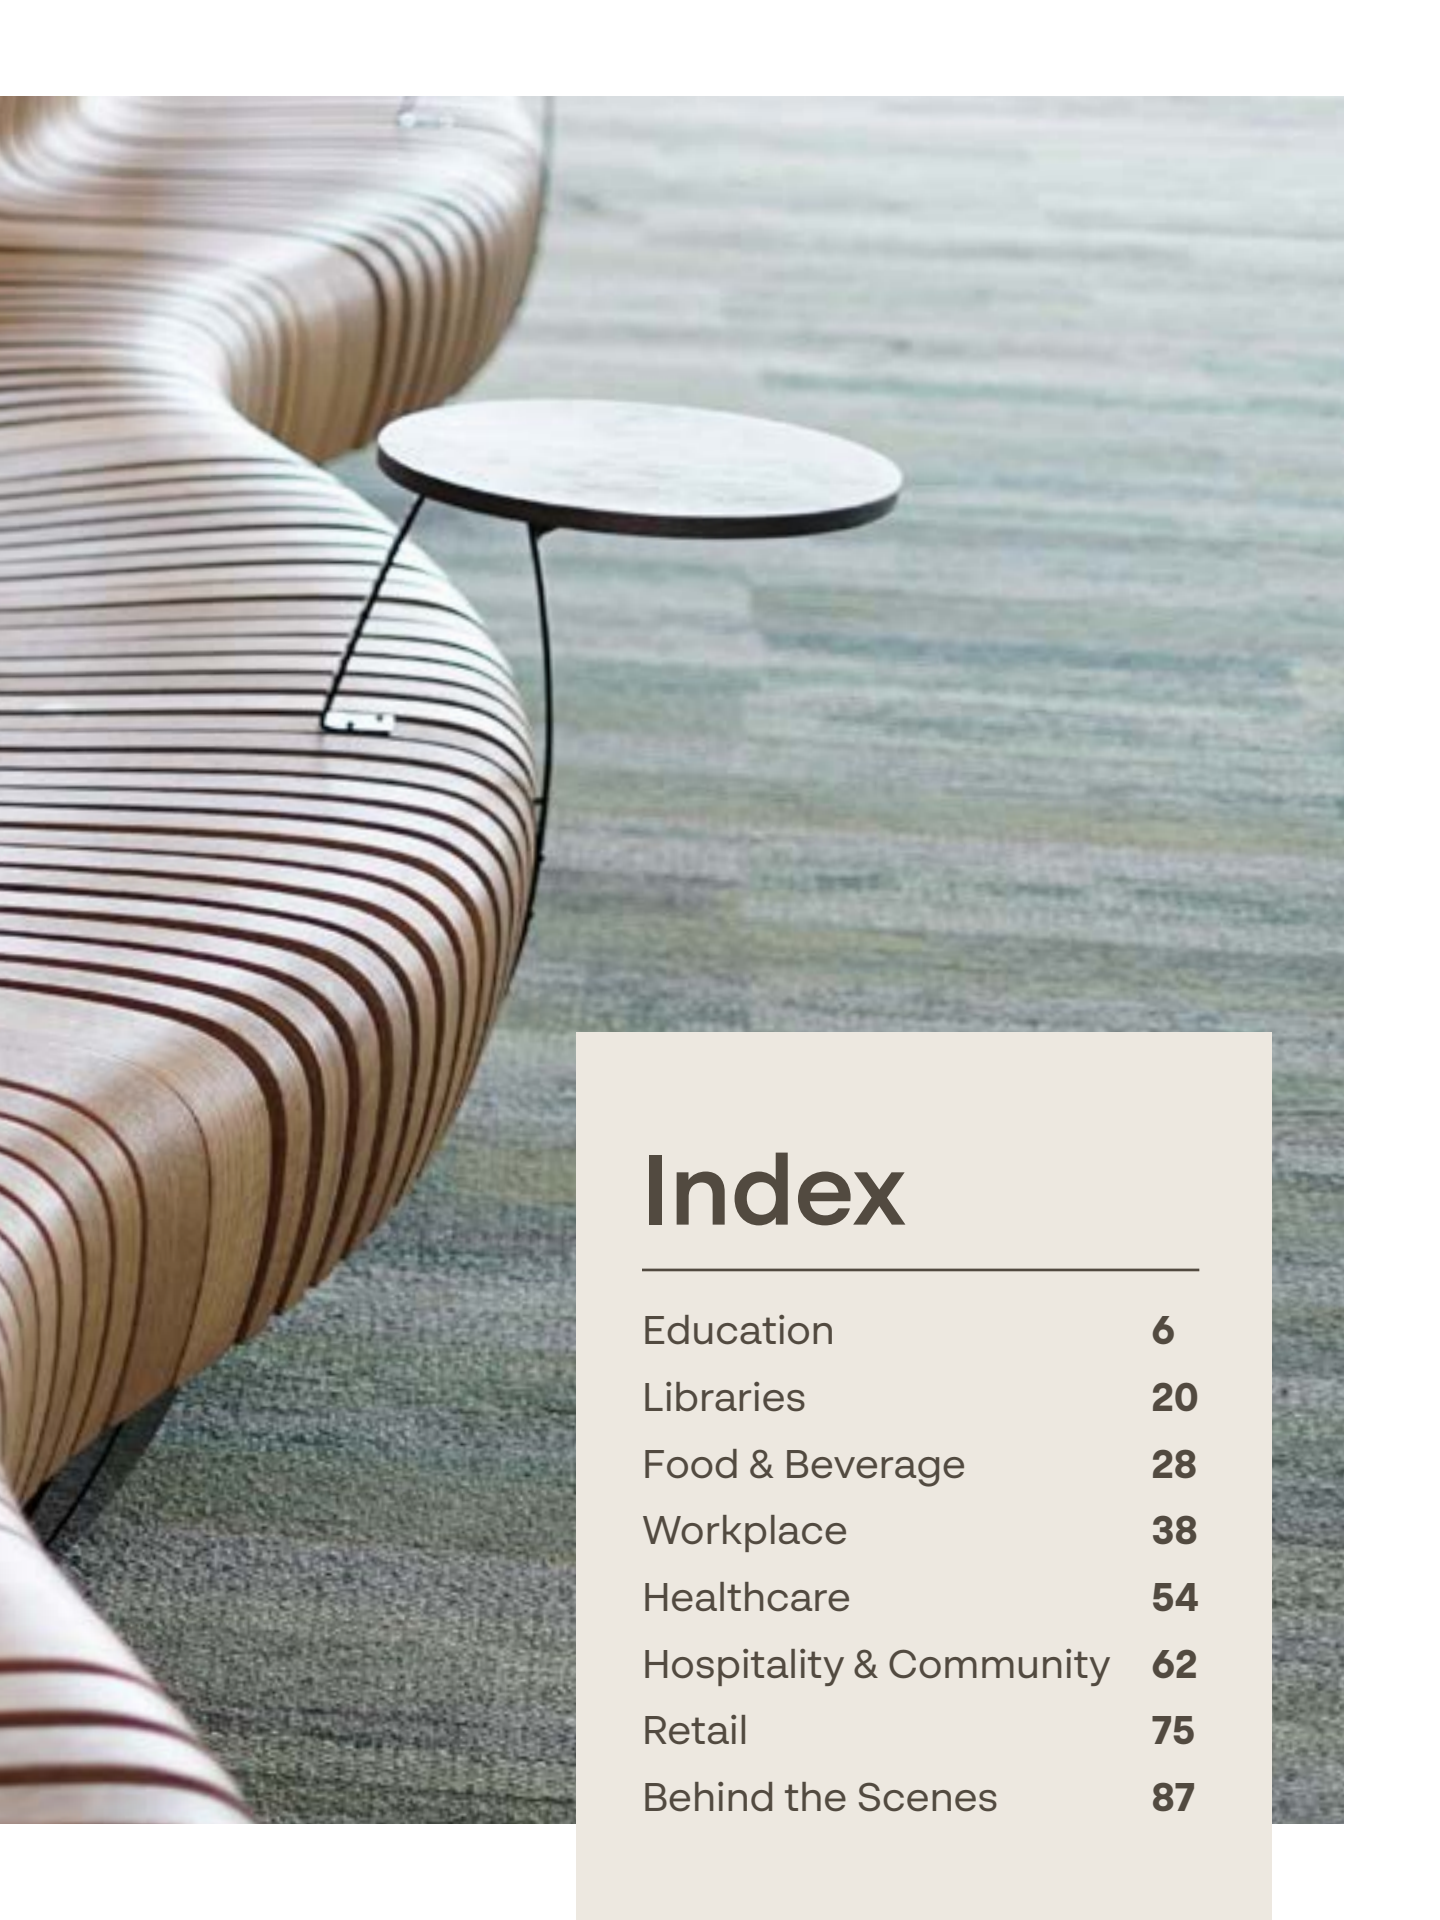

Our modular furnishings mirror the identity of the surrounding architecture and landscape in a seamless, sculptural way. The solutions we provide are highly functional and environmentally sound. They boast rugged durability and iconic design without compromising affordability.

A Green Place becomes a destination in your building as well as its crowning element – a refuge, a meeting place or an on-the-go workplace. There's no limit to how you can put our products to use.

This collection of our favorite projects highlights the wealth and possibilities of our unique place-making furnishings. We hope it will ignite your imagination as much as it does ours!

The image shows a bright, modern dining or lounge area. In the foreground, a white, oval-shaped high-top table stands on a thin metal leg, with a white bar stool tucked under it. The floor is a light-colored, polished material with blue decorative lines. In the background, there are several round tables with white tablecloths and brown chairs. Large windows on the left side of the room let in natural light, creating shadows on the floor. A dark green rectangular overlay is positioned in the upper right corner, containing the text 'Food & Beverage Sector' in white, sans-serif font, with a thin white horizontal line below it.
